

NHS England require that the net earnings of doctors engaged in the practice is publicised and the required disclosure is shown below.

However, it should be noted that the prescribed method for calculating earnings is potentially misleading because it takes no account of how much time doctors spend working in the practice and should not be used to for any judgement about GP earnings, nor to make any comparisons with other practices.

The average earnings for GPs working in Glenfield Surgery in the last financial year ending in 2022/23 was £143,358 before taxation and National Insurance.

This is for 5 part time GPs and 4 locum GPs who worked in the practice for more than 6 months.
